

DOES MY BUILDING NEED AN OVERHANG?

What are the benefits?

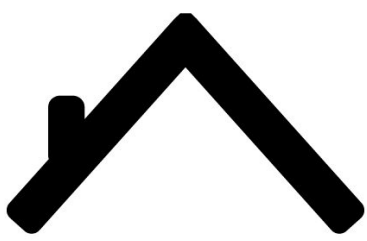

Drainage

An overhang of 6" to 10" provides drainage that keeps water and debris away from the building's walls

Durability

Proper drainage increases the overall durability and life of the building, adding an additional 10 to 20 years

Aesthetics

Overhangs create a quintessential look, combining functionality with classic style.

Overhangs come standard on all our buildings.

BLACK LAKE BUILDINGS

"Portable buildings you can be proud of."
